SUMMARY

Microsoft certified Data Analyst bridging business and technical teams to build dashboards and data pipelines for real-time performance visibility. Proficient in SQL, Python, and Tableau, with a track record of defining core metrics and automating data processes that cut errors by 95% and saved five hours per week. Skilled at delivering clear, actionable insights to inform product and go-to-market strategies.

WORK EXPERIENCE

Loblaw Companies Limited

Supply Chain Replenishment Data Analyst

Jun. 2025 – Present

Brampton, Ontario

- Removed manual data entry from the Store Support team's vendor-order conversions by building an automated SharePoint-to-SAP pipeline (Python, SQL), improving data accuracy by **95%** and replacing an error-prone manual process with a standardized one.
- Built an automated exception-detection pipeline (Python, API extraction) over **2000+** store forecast data that flags and logs anomalies for weekly review, accelerating root-cause identification, and giving planners a structured queue of issues to investigate.
- Eliminated high-volume manual processes for the Store Demand Planning team by designing SAP automation (Python, SQL, VBA), then documented the workflows and trained colleagues to drive team-wide adoption saving **5hr/week**.
- Designed and maintained real-time dashboards in Mode to monitor key supply chain metrics, ensuring consistent definitions across reports and enabling stakeholders to quickly identify performance trends.

Abs Manufacturing

Supply Chain Data Analyst

Jan. 2022 – Dec. 2022

India

- Accelerated project completion by **20%** by establishing direct communication between the data team and department heads, reducing inventory discrepancies with Power BI.
- Reduced inventory holding costs by **8%** by building and analyzing KPI-based inventory reports in Power BI, SQL, and Excel and managing purchase orders to meet service level targets.

SKILLS

Data & Analytics: SQL, Python (pandas, APIs, automation), quantitative analysis, root cause analysis, exception detection, demand forecasting, time-series analysis, KPI reporting, A/B Testing, AI Coding and Analytics Tools

Reporting & Visualization: Tableau, Power BI, Excel (advanced, VBA)

Process & Automation: Process design for error reduction, Power Automate, continuous improvement (Lean Six Sigma, DMAIC)

Certification: Microsoft Power BI Data Analyst Associate ([PL-300](#))

EDUCATION

Concordia University

Masters in Industrial Engineering

Jan. 2023 – Oct. 2024

Montreal, Quebec

Specialization: Industrial Optimization and System Analytics

Aligarh Muslim University

Bachelors in Mechanical Engineering

Aug. 2018 - May 2022

India
